Re: Software Engineering Internship

Dear Internship Coordinator,

The Software Engineering position came highly recommended to me by [Referral name], Software Engineering Intern at [Company]. [Referral Name] and I worked together as a Freelance Software Developer for 2 years and he believes my programming experience will have a profound impact on the organization.

Having reviewed your job description, makes me confident that my skills, wide-range of experience and passion for programming would be a solid match for this position. For the past two years, I have been working as a Freelance Web developer, and this job has given me the opportunity to grow my technical skills, deal with complex enterprise software platforms, server side development and working with data structures and algorithms. Therefore, have an overall strong understanding of Software and Web development.

I am a self-motivated and highly effective team member and equally comfortable working independently and in this position, not only will my passion for programming grow, I will also enjoy being challenged with projects that require me to work outside my comfort and knowledge set.

Thank you for taking the time to consider my qualifications and the potential value I would bring to [Company]. I look forward to speaking with you further about my experience and passion for all aspects of software development. I can be reached at (647) 804-6515 or via email at Mohammad.abdolhosseini@georgebrown.ca

Regards,

Mohammad Abdolhosseini
